PROJECTS

Quant Trading App | [GitHub](#) | [Live Demo](#) June 2026

React, TypeScript, Python, FastAPI, SQLAlchemy, PostgreSQL (Supabase), LangGraph, Pandas, NumPy

- **Architected an autonomous LLM research agent** using LangGraph (ReAct framework) orchestrating 5 specialized financial tools to generate cited buy/hold/sell trade theses, cutting query latency from ~2 minutes to ~30 seconds via pipeline optimization.
- **Engineered a parallel stock-screening engine** processing 134 NSE-listed equities via a multi-threaded worker pool, computing real-time SMA, RSI, and ATR technical indicators to rank momentum candidates in under 2 seconds per scan pass.
- **Implemented a multi-tenant backend** with FastAPI, SQLAlchemy, and PostgreSQL, incorporating JWT authentication, bcrypt password hashing, and row-level data isolation for user portfolios, execution logs, and live position metrics.
- **Developed an automated backtesting engine** computing Sharpe ratio, maximum drawdown, and win rate against historical benchmarks; built a responsive, dark-mode analytics dashboard with automated risk controls and deployed to Vercel and Supabase.

Expense Tracker via WhatsApp | [GitHub](#) August 2026

TypeScript, React, Node.js, Meta Cloud API, Gemini AI, PostgreSQL (Supabase), Vercel

- **Built a conversational financial tracking agent** integrating Meta Cloud API (WhatsApp Webhooks) and Gemini AI to parse unstructured natural-language inputs (e.g., "rs 247 debit food") and execute zero-friction transaction logging.
- **Designed a multi-bucket balance tracking architecture** (bank accounts, liquid cash, custom funds) featuring auto-resetting monthly budget thresholds and an automated start-of-month salary-confirmation reconciliation workflow.
- **Developed a full-stack financial dashboard** in React and TypeScript with a Node.js/Supabase backend, supporting real-time transaction auditing, bucket lifecycle operations (add/edit/delete), and historical debit/credit visualizations.

Stock Trading Simulation Game | [GitHub](#) 2026

Python, FastAPI, React, TypeScript, Vite, Material UI, yfinance

- **Built an Indian equity (NSE) paper-trading platform** integrating real-time market data streams via yfinance, allowing users to execute simulated limit/market orders with virtual currency and zero capital exposure.
- **Engineered a client-side portfolio management engine** rendering interactive line and candlestick charts to compute dynamic asset allocation, total position valuation, and real-time unrealized/realized P&L calculations.

TECHNICAL SKILLS

Languages: Python, SQL, Java, TypeScript, JavaScript

Frameworks & Libraries: FastAPI, React, Node.js, LangGraph, SQLAlchemy, Pandas, NumPy, Scikit-Learn, Matplotlib, Vite, Material UI

Databases: PostgreSQL, Supabase, MySQL, SQLite, MongoDB

APIs & Cloud: REST APIs, Meta Cloud API, Vercel

Developer Tools: Git, GitHub, Power BI, Tableau

EDUCATION

SRM Institute of Science and Technology - Ghaziabad 2023 - 2027

Bachelor of Technology (B.Tech) in Computer Science and Engineering CGPA: 8.17 / 10.0

CERTIFICATIONS

Tata Group - Data Analytics Job Simulation (Tata iQ) | [Certificate](#) August 2026

- Conducted exploratory data analysis (EDA) and credit risk indicator modeling; architected an agentic AI delinquency recovery and collections strategy.

NPTEL - Natural Language Processing (IIT) | [Certificate](#) April 2026

- Completed rigorous curriculum covering tokenization, statistical language models, sequence-to-sequence networks, and transformer-based NLP pipelines.

RELEVANT COURSEWORK

Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Design & Programming (OOP), Computer Networks, Artificial Intelligence, Data Science, Data Mining & Analytics

EXTRACURRICULAR ACTIVITIES

- **Competitive Programming & Technical Exploration:** Independently research quantitative trading strategies and financial markets beyond the academic curriculum.
- **Strategic Gaming & Esports:** Compete in multiplayer and strategy-based games requiring analytical thinking and fast decision-making under pressure.
